

WHY CIFA

**Portable Pumps
and Placing Booms**

WHY CIFA

PORTABLE PUMPS

CIFA pumping solutions are the result of a long experience in concrete application. They are designed and manufactured in the factory of Italy. With more than 40 years of history, CIFA portable pumps mean performance and reliability to satisfy all construction requirements. CIFA portable pumps range offers the best solutions for any jobsite conditions.

MANUFACTURING FACILITIES

PORTABLE PUMPS LEAN PRODUCTION

PRODUCTION TESTING AREA

LEASING

Available in Italy, Russia, China, South Africa, Australia, USA and Germany.

ITALIAN DESIGN

Main components of the CIFA truck pumps are Italian or German brand

TRAINING FOR OPERATORS

PORTABLE PUMPS

Full range with different concrete output and pressure, from 30 to 90 m³/h.

PLACING BOOMS

Advanced solutions for skyscrapers building.

PIPE AND DEVICES

To pump the concrete from the portable pumps to placing booms in the best way.

The CIFA portable concrete pump series offers a wide range of models which satisfy the various needs of concrete pumping and handling both in tunnels and above ground, over long distances and at considerable heights. Both diesel and electric motors models are available to accommodate every application and environment requirement. PC 607 and PC 709 are also available in crawler-mounted versions, fully equipped to work in hard-to-reach jobsites. The CIFA original pumping unit incorporates the characteristics of resistance, long life and exceptional performance with any type of concrete. The main pump is an axial piston type with variable flow and constant power, a gear pump is used for auxiliary services.

- S-valve for any type of concrete, made of special steel and different thicknesses
- Rapid valve exchange
- Ideal operation even at high pressures with continuous and smooth pumping flow
- Automatic wear compensation
- Hydraulic system in open circuit
- Low noise
- Low running costs
- Easy maintenance and quick cleaning operations
- Machines can work up to -25°

PORTABLE PUMPS STRONG AND RELIABLE

Cifa portable concrete pump series offers a wide range of models to satisfy the various needs of concrete pumping over long distances and at considerable heights.

POWER

The power source is provided by separate engine, diesel or electric. Available with diesel engines STEP3-A and Stage V, turbo and with water cooling. The electric motors are supplied according to IE3 rules.

HYDRAULIC AND ELECTRONIC PUMPS

The main pump is an axial piston type with variable flow and constant power; gear pump is used for auxiliary services.

REMOTE CONTROL

The Concrete pump comes complete with a 15 meter cable remote control as standard feature. It is also possible to have a radio remote control as option. Available only for S6 Series.

WATER PUMP

Hydraulically driven water pump with washing pipe complete with nozzle.

AIR COMPRESSOR

Available on request. Driven by hydraulic motor for pipeline cleaning.

CONTROL PANEL

The control panel has all the commands and control instruments to ensure an easy and safe use. There is a display indicating the main parameters of use to check the maintenance scheduling. Available only the S6 Series.

"S" VALVE

The structure is made with varying thickness to achieve maximum resistance to wear even when using difficult types of concrete.

WEAR RING AND WEAR PLATE

The ring and the plate are made of special anti wear material against abrasion and stress due to the concrete flow.

VIBRATOR ON GRID

The standard supply includes the electric vibrator on grid controlled by remote control with cable.

GREASING SYSTEM

To reduce maintenance the pumping units are equipped with an automatic greasing system including electric pump with grease tank.

PUMPING UNITS

GP "S6" SERIES

Open Loop type

GP "S8" SERIES

Open Loop type

MAIN IMPROVEMENTS:

- Hopper new design and dimension.
- S-valve new shape.
- New cutting ring solution.
- New anti-wear components: Plate and cutting ring.
- Manual swing door.

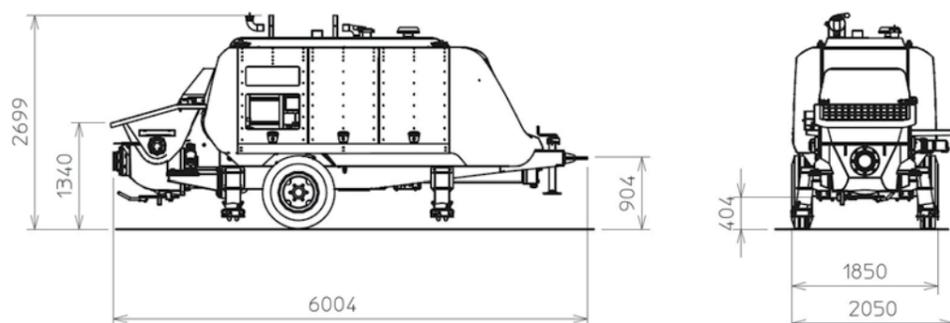

DATA SHEET

S8 SERIES

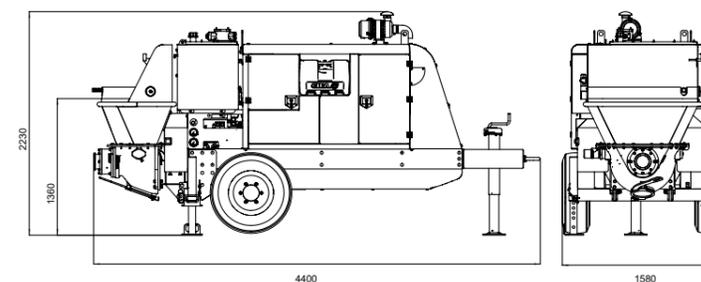

Model		PC 709/415	PC 907/612	PCC 907/612
Drive power IIIA	kW	130	130	130
Drive power Stage V	kW	130	130	130
Drive Power Electric	kW	110	110	110
Max. theoretical output (□/◆)	m³/h	70 / 46	87 / 51	87 / 51
Max. pressure on concrete (□/◆)	bar	90 / 140	66 / 119	66 / 119
Max. number of cycles per min. (□/◆)	-	20 / 13	26 / 15	26 / 15
Concrete cylinders diameter	mm	200	200	200
Stroke Length	mm	1800	1800	1800
Concrete hopper capacity	l	450	450	450
Rod side drive □	-	□/◆	□/◆	□/◆
Piston side drive ◆	-	□/◆	□/◆	□/◆

S6 SERIES

Model		PC 307	PC 506/309	PC 607/411	PCC 607/411
Drive power IIIA	kW	43	74.5	83	83
Drive power Stage V	kW	55	74.4	85	85
Drive Power Electric	kW	30	55	75	75
Max. theoretical output (□/◆)	m³/h	30	52 / 34	60 / 40	60 / 40
Max. pressure on concrete (□/◆)	bar	70	41 / 65	67 / 105	67 / 105
Max. number of cycles per min. (□/◆)	-	21	36 / 24	41 / 27	41 / 27

PC 158 STRONG AND RELIABLE

PUMPING UNIT

With 80 bar of maximum pressure, the PC 158 machine can pump between 2 and 15 cubic meters per hour of concrete to considerable heights and distances.

PC 158 is a 2-cylinder hydraulic piston pump with S-valve and variable output for pumping concrete, micro-concrete, special concrete and for shotcrete.

PC 158 is a reliable choice, especially in difficult working conditions.

PC 158 can be used both for concrete and mortar pumping thanks to its optimized hydraulic layout design.

4-cylinder liquid cooled diesel engine

Hopper assembly with S-valve and agitator

Centralized lubrication system

Hydraulic circuit with optimized exchange sequence

Electromechanical control board

Variable displacement hydraulic pump

30 m cable remote control

Accessory box

Concrete grill with electric vibrator

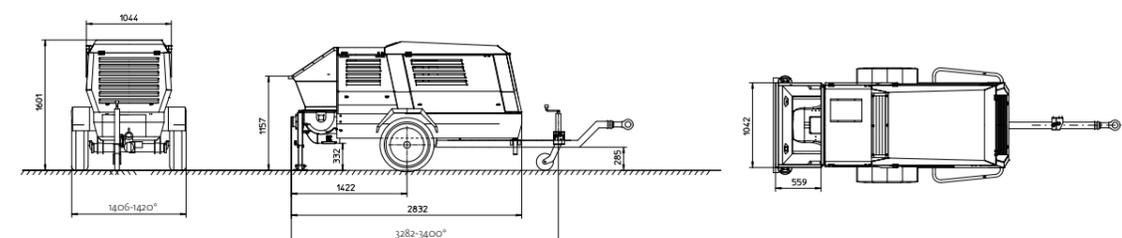

Light and extremely handy

Intuitive control panel

PC 158

Model		PC 158
Liquid cooled diesel engine	-	STAGE IIIA OR STAGE V
Electric motor (upon request)	-	22 KW-400 V 50 HZ
Infinitely adjustable	m ³ /h	from 2 to 15
Max. theoretical output*	bar	80
Hopper capacity	l	250
Delivery distance*	m	200
Delivery height*	m	100
Chassis	-	Manual drawbar-fixed axle and pneumatic wheels Articulated tow bar with braking system*

PC 507 RUGGED SUPERIOR PERFORMANCE

PUMPING UNIT

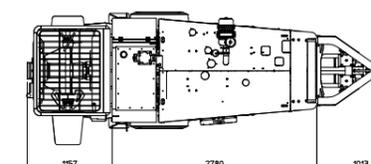

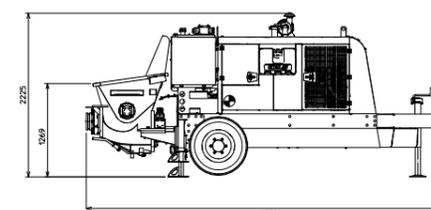

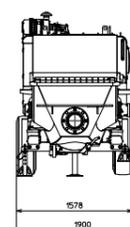

Main features

- Electric vibrator on the hopper grid
- Rigid monoaxle trailer
- Drawbar
- N° 3 manual outriggers
- Concrete outlet piping with bend and counterbend reduction device up to 5"
- Centralized automatic lubrication system
- Hydraulically driven water pump 50 l/min - 50 bar
- Concrete flow rate regulator on board
- Hydraulic system in open circuit
- Quiet pumping with high performances: smooth, continuous and easy movements

PC 507

		PC 507
Drive power Stage V	kW	55
Max. theoretical output	m ³ /h	54
Max. pressure on concrete	bar	71
Max. number of cycles per minute	-	28
Concrete cylinders (diam. x stroke)	mm	180x250
Concrete hopper capacity	l	500
Weight	kg	3980
Rod side drive □ / Piston side drive ◆	-	◆

SPECIAL PUMPING ADDITIONAL COMPONENTS

A distribution system, to be defined as "Full Line", must include also concrete pipelines. CIFA Standard Pipes and double layer Long Life Pipes are able to resist at high pressure and to last longer. A concrete delivery line by CIFA also includes reductions, gaskets, joints, supports and others accessories.
