

WHY
CIFA

Truck Pumps
STEELTECH Series

WHY CIFA

MORE THAN 15.000 TRUCK PUMPS SOLD IN THE WORLD

It was the end of 60's when Cifa produced the first truck pump. Since then, Cifa has been designing, producing and developing the most advanced technology, bringing every year to the market new reliable solutions. Solutions to prove that CIFA truck pumps are better than ever. Always.

READY FOR DELIVERY

MANUFACTURING FACILITIES

LEAN PRODUCTION

LEASING

Available in Italy, Russia, China, South Africa, Australia, USA and Germany.

ITALIAN DESIGN

Main components of the CIFA truck pumps are Italian or German brand

MOUNTED ON ALL TRUCK BRANDS

CIFA truck pumps can be mounted on all truck brands. According to CIFA truck specifications documentation

TRAINING FOR OPERATORS

PLACING BOOMS

Available lengths to reach all distances: from 20 meters to 58 meters.

STABILIZATIONS

Different types of stabilization in order to guarantee a safe work in a small area.

PUMPING UNITS

Three open loop types and two closed loop types according to the desired way of pumping.

CONTROL SYSTEMS

Designed and positioned to make the job easier and to speed up all the operations.

SAFETY

Different systems to work and move the boom in all its configurations in total safety.

FINISHING

Customized painting available upon customers' request.

PLACING BOOM

STRENGTH AND RELIABILITY:

The booms mounted on CIFA truck pumps combine both strength and reliability. Each section of the boom has been designed for maximum structural resistance and fatigue strength. These advanced booms reduce to the minimum the areas subjected to stress intensification when in operation.

VERSATILITY AND FLEXIBILITY:

Different configurations of the booms on CIFA truck pumps ensure the greatest operative versatility and enable to reach almost any part of the construction yard, even those accessible with the most difficulty. Complete working flexibility together with great working speed, allows the complete extension of the boom and its perfect positioning in few minutes.

ZR Type

Suitable for the boom opening inside the buildings and for concrete pouring near the truck pump.

Available for:
K20L - K24L

Z Type

Quick opening operations for concrete pouring near and far from the truck pump.

Available for:
K31L - K36L-5 - K36L - K38L

RZ Type

Ideal for 5 and 6 sections boom. It provides maximum flexibility by combining R+Z solutions.

Available for:
K42L - K50L - K55L - K56L - K61L - K63L

FOLDING SYSTEMS

The structural strength and stiffness of the sections ensure limited oscillations even on longer booms.

The working speed, guarantees the complete extension of the boom and a quick and perfect positioning.

STABILIZATION

The front stabilization is available in four design concepts: single horizontal, single, double and triple telescopic-X-style outriggers. The rear stabilization is available in three design concepts: fixed, single extension and swing-out. Each machine has its stabilization system according to the size of the boom.

Front: **Single telescopic horizontal**
Rear: **Fixed**

Available for:
K20L

Front: **Double telescopic X style**
Rear: **Fixed**

Available for:
K24L

Front: **Single telescopic X style**
Rear: **Single horizontal**

Available for:
K31L - K36L-5

Front: **Single telescopic X style**
Rear: **Swing-out**

Available for:
K38L - K36L

Front: **Double telescopic X style**
Rear: **Swing-out**

Available for:
K42L - K50L - K56L

Front: **Triple telescopic X style**
Rear: **Swing-out**

Available for:
K61L - K63L

All outriggers are designed to stabilize the machine in the right way in extraordinary tight spaces.

The sequences of the extension phase are quick in order to accelerate the stabilization.

Each outrigger can be used as a tank with a capacity ranging from 400 to 700 liters.

PUMPING UNIT

Completely removable, the pumping unit ensures gentle, continuous and regular flow. This technology guarantees an extremely efficient system for pumping different types of concrete, with aggregates of all sizes, reducing the number of cycles per minute while maintaining the same flow rate, thus ensuring less wear and longer life.

"S" VALVE:
The structure is made with varying thickness to achieve maximum resistance to wear even when using difficult types of concrete.

WEAR RING AND WEAR PLATE:
The ring and the plate are made of special anti wear material against abrasion and stress due to the concrete flow.

CIFA LONG LIFE PIPES MADE BY CIFA
CIFA truck pumps have long life pipes as standard equipment.

CIFA truck pumps have the first bend outside the pumping unit in long life pipes as standard equipment.

Open Loop: Hydraulic management

709

Available for:
K20L

HP907H

Available for:
K24L

HP1606H

Available for:

**K31L - K36L-5 - K36L - K38L
K42L - K50L - K56L - K61L**

Closed Loop: Electronic or hydraulic management

HP1608EC

Available for:

**K24L - K31L - K36L-5 - K36L - K38L
K42L - K50L - K56L**

HP1808ECX

Available for:

K42L - K50L - K56L - K61L - K63L

The quiet pumping system

A revolutionary system to drastically reduce vibrations, wear and noise. The "core" of the vibration is caused by the pumping unit movement therefore the system is placed in the 3 main fixing points and, thanks to the rubber absorbers, it reduces the vibrations transferred to the frame keeping the boom still while pumping.

- Low vibration
- Low noise
- Higher comfort of use
- Improved balancing while working
- Less wearing of key components

Rear Damping System

Front Damping System

PUMPING UNITS		709	HP907H	HP1606H	HP1608EC	HP1808ECX
MAX. THEORICAL OUTPUT	m ³ /h	70	90	160	160	180
MAX. PRESSURE ON CONCRETE	bar	85	70	53	80	83
MAX. NUMBERS OF CYCLES PER MIN.	n	25	28	30	31	27
CONCRETE CYLINDERS (DIAM. X STROKE)	mm	200x1500	200X1650	230x2100	230x2100	260X2100
CONCRETE HOPPER CAPACITY	l	500	550	550	550	600
HYDRAULIC CIRCUIT	type	open	open	open	closed	closed

CONTROL SYSTEMS

DETACHABLE ELECTRICAL SYSTEM

The electrical system can be detached for easy maintenance.

HYDRAULIC OUTRIGGERS CONTROL

Hydraulic controls on both sides of truck pump. The machine emergency stop is also positioned nearby.

WIRED VIBRATOR AND HORN REMOTE

Convenient cable control dedicated to the mixer driver. It can be used from both sides of the hopper.

BOOM PROPORTIONAL DISTRIBUTOR

Ergonomic hydraulic controls for boom.

REMOTE CONTROL

Comfortable and lightweight for boom control and the management of the main machine functions. Different models and brands available.

REAR CONTROL PANEL

Control panel positioned on the rear side.

Easytronic

Machine management system for Steeltech series pumps with open loop pumping units

SILVER (Standard)

DISPLAY LCD 5"

The standard version includes:

- Pumping unit management
- Diagnostics
- Counters
- Auto vibration

GOLD (Option)

Easytronic Silver

+

LSC - Light Stability Control

Limits the boom slewing angle when any outrigger cannot be fully opened. Includes: Autormp

Smartronic®

Machine management system for Steeltech series pumps with closed loop pumping units

SILVER (Standard)

DISPLAY LCD 7"

PUMPING UNIT MANAGEMENT

Automatic hopper-grid vibration

DIAGNOSTICS

In case of fault, the operator is guided to understand what's the subpart involved and graphically guided to understand the issue

COUNTERS

GOLD (Option)

Includes SILVER functions plus:

AUTO RPM

Fully adjustable automatic truck RPM management

RAMPS MANAGEMENT

Fully adjustable pumping ramps management

MBE

Max Boom Extension

ASC

Advanced Stability Control

Smartronic Advanced

(Add-on Option for Smartronic GOLD)

Automatic Boom Folding and Unfolding

The function allows to open and close the boom automatically using a dedicated command on the radio remote.

ASC 2.0

Gives the possibility to move some boom sections even when the limit of the safety coefficient is reached.

Boom Antibouncing System

The Anti-Bouncing function strongly reduces boom oscillations (up to -25%).

Radio remote control with display

OPTIONS

LIGHTS HOLDER UNDER THE HOPPER

CIFA VISTA: Remote machine monitoring

Pumping unit dampening

TWO DIFFERENT TYPES OF SHUT OFF VALVE AS OPTION

The shut-off valve stops immediately the flow of the concrete.

Shut Off valve on endhose

Shut Off valve in pipeline

Activation by remote control

High pressure water pump

Air compressor for pipeline cleaning

Hopper cover

Rear camera

List of other components available on demand

Wood stocks holders

Ladder to fuel tank access

Light on boom

K56L - POLAND

K36L - TURKEY

K20L - ENGLAND

K42L - U.S.A.

K50L - ITALY

K38L - U.S.A.

K36L-5 - UK
